

8th of June: it begins the 1st AMC Training Program at TUTE

The First “**AMC Training Program at TUTE**” (Tianjin University of Technology and Education) started on the 8th of June and it will last between 8 and 12 weeks. During this period students will learn about die design, different prototyping techniques and casting and EPS patterns manufacturing methods.

The program has been a big success with more than 80 students registered. The best students of this promotion will profit **an internship in AMC’s offices in Spain** for four months.
